🔗 Portfolio: khaled-sadlah.netlify.app

PROFILE

Computer Systems Engineer with strong foundations in Object-Oriented Programming, Data Structures, Algorithms, and Software Engineering. Experienced in Python, C++, QA automation, computer vision, and intelligent systems. Developed a smart assistive system for visually impaired users integrating OCR, face recognition, object detection, and indoor navigation. Passionate about solving complex technical challenges and contributing to innovative R&D teams.

EDUCATION

Computer Systems Engineering, at Arab American University with a GPA of 3.3

11/2020 – 06/2026

SKILLS

Computer Science

- Object-Oriented Programming (OOP)
- Data Structures & Algorithms
- Problem Solving
- Software Engineering Principles

Databases

- SQL
- Oracle Database

Programming

- C++
- Python
- JavaScript
- TypeScript

Mobile

- Flutter
- Dart
- Android

Web Development

- REST APIs
- FastAPI / Node.js
- Laravel
- Angular
- HTML / CSS

Backend & APIs

- REST APIs
- Firebase
- Firestore
- FCM Push Notifications

Tools

- Git / GitHub
- Postman
- Jira
- Docker
- Linux
- Cypress

TRAINING & PROFESSIONAL PROGRAMS

Quality Assurance

Asal Technologies

03/2026 – Present | Jenin

300-hour program covering: software testing foundations, Agile QA, test design techniques, API testing, Postman, Pytest, automation testing with Cypress, Jira, CI/CD pipelines, security & performance basics, and AI-assisted testing concepts.

Backend Development Training – Boot.dev

Foothill Technology Solutions

02/2026 – 04/2026 | From Home

290-hour backend training covering Python, Git/GitHub, TypeScript, SQL, Docker, CI/CD, and distributed systems.

Full Stack Development Program

Think Deep Academy

02/2023 – 10/2023 | Nablus

150-hour program covering React.js, Node.js, Express.js, databases, API integration, and modern frontend tools.

EXPERIENCE

First Lego League (FLL) Coach

06/2019 – 07/2020 | Tulkarem

- Prepared students for First Lego League (FLL) competitions.
- Designed and programmed LEGO EV3 robotic solutions.
- Implemented sensor integration and autonomous robot behaviors.
- Guided teams in engineering design, algorithm development, and competition strategy.

STEM & Robotics Instructor

Abdalraheem Mahmoud School

02/2018 – 05/2019 | Tulkarem

- Delivered robotics and programming training for school students.
- Taught Micro:bit programming, robotics fundamentals, and engineering problem-solving.
- Designed project-based learning activities and guided students in developing interactive solutions.
- Mentored students in teamwork, critical thinking, and technical presentation skills.

PROJECTS

Smart Glasses for Blind and Visually Impaired People

02/2025 – 02/2026

Github: <https://github.com/khaled-sadlah/Smart-Glasses-Application>

- Developed OCR text recognition system using OpenCV and Tesseract.
 - Implemented face recognition and object detection modules.
 - Designed indoor navigation system using Wi-Fi fingerprinting and path planning algorithms.
 - Built Flutter mobile application integrated with Firebase.
 - Applied software engineering principles, algorithm design, and system integration.
- Technologies: Python, OpenCV, Tesseract OCR, Flutter, Firebase, Wi-Fi Fingerprinting

QA Automation Framework for Full Stack FastAPI Application

03/2026

- Developed automated test suites using Cypress and TypeScript.
- Implemented Page Object Model architecture for scalable test automation.
- Created UI and API test scenarios covering authentication, dashboard, and item management modules.
- Applied API interception and response validation techniques.
- Generated automated test reports and execution artifacts.
- Performed testing on a pre-built Full Stack FastAPI template application.
